

1. What type of experience will a user have when they first enter the website? (do they need a guided tutorial of the website?)
2. Who is the target audience you're hoping for? Experienced users/musicians, students and teachers?
3. Should the app have an email login system?
4. Would you like an interface where users can choose which genre of music they'd like to see? Is there a certain way you want the music to be sorted by?
5. What music notation will the website support? standard,tabs, percussion, all?
6. Should the app include a metronome?
7. How many pages do you want on your website?
8. Will the app track progress in some way? Track how many songs played/mastered?
9. Do you want to have playback for the piece you are trying to play?
10. Should the playback be modular? (slowed down or sped up)
11. What other products have you tried and what do you like and don't like about them?
12. Will there be an interactive instrument/how many notes will you be able to play on an interactive instrument? (will you allow key changes?)
13. Will the app allow users to compose their own music?
14. Do you want the app to have interactive sheet music that can be played along with (e.g., scrolling with the music)?
15. Should the app have just the music or should it teach you the theory along with it as well?
16. Do you want a sleek, minimal design, or should it be more colorful and engaging for younger audiences?
17. Should the app allow users to change the difficulty level of lessons as they progress or based on their preferences?
18. Do you need an integrated calendar or scheduling feature so users can plan their practice sessions?
19. Do you want to incorporate visual aids like animated finger placements, light-up keys, or virtual fretboards to help learners?
20. Should the app provide a "challenge" system, where users are tasked with learning specific songs or techniques in a set period?
21. Do you want different displays of the music sheet? (ergo one note at time, scrolling)
22. How do you envision the user learning within the app? Should it be self-paced or structured with set milestones?
23. Do you want the app to be accessible to users with special needs, like those who are hearing impaired or blind?
24. Should the user be able to save/download music?
25. Do you want a feature where users can share composed music?
26. Will the app have a streak system for the number of days used in a row?
27. Would you like to recommend songs based on a person's skill level?

28. Should the app have access to APIs such as spotify and youtube?
29. How many instruments do you want the app to start out with?
30. Should the app save data so they can pick up another device and pick up where they left off?
